Davide Trenti

Senior Software Engineer — Games & Real-time 3D

Modena, Italy · +39 346 6357724 · davtrenti@gmail.com · thirtiez.github.io/portfolio · linkedin.com/in/davide-trenti-202668138 · github.com/Thirtiez

PROFILE

Software engineer building games and real-time 3D software since my university years, professionally since 2020: Unreal Engine 5 and C++ today, Unity and C# before that. Owned development of a live mobile game with 100M+ downloads, shipped XR apps for museums and industry, and now build drawing tools for a UE5 BIM platform. Daily, disciplined user of coding agents.

EXPERIENCE

UE5 Software Engineer · Zuru Tech Italy — Jul 2022 – Present

- Build drawing features for a UE5 BIM platform whose designs go straight to an automated factory, in a large C++ codebase.
- Work in a quality-first team: code reviews, CI/CD pipelines, Agile.
- Member of the AI Enabling team: adopted AI-assisted development before today's coding agents existed, worked out what holds up in production, and taught it to the other teams one by one.

Unity Software Engineer · Miniclip — Feb 2021 – Jul 2022

- Owned the Golf Battle project (100M+ downloads): live real-time multiplayer, player customization and in-app purchases.
- Shipped features on a live-ops cadence; contributed to shared tools and services and the CI/CD pipeline.

XR / Mobile Software Engineer · Infinity Reply — Jan 2020 – Jan 2021

- Built XR (VR and HoloLens 2), web and mobile apps and advergames for brands and institutions, including ITALY. Land of Wonders, SnApp Snam, Geox PlayKix and Virtual Museum De Fornaris.
- Ran several client projects at once on tight deadlines, taking many from scratch to release across Android, iOS, WebGL and HoloLens.

Back-end Software Engineer · Cluster Reply — Jan 2019 – Dec 2019

- Built and maintained live web applications on .NET.

Thesis Intern · Altec — Sep 2017 – Jun 2018

- VR visualization of astronomical data for my Master's thesis.

SKILLS

Engines	Unreal Engine 5, Unity · working knowledge: Godot 4
Programming	C++, C# · working knowledge: GDScript, TypeScript
Platforms	Windows, macOS, Android, iOS, Meta Quest / Rift, HoloLens, WebGL
Agentic coding	Claude Code, OpenAI Codex, multi-agent workflows, MCP, spec-driven development
Tools	Git, GitLab, GitHub, Perforce, Jenkins, Jira, .NET, Azure

EDUCATION

2015 – 2018	**MSc Computer Engineering — Graphics & Multimedia** · Politecnico di Torino
2011 – 2015	**BSc Computer Engineering** · University of Modena and Reggio Emilia

LANGUAGES

Italian (native) · **English** (C2)
